

Iridology

The science of diagnosis using your iris is called 'iridology';

Information that may be obtained:

- .the health of your digestion & metabolism of wastes
- .how you manage your blood sugar
- .the efficiency of your circulation, respiration, hormones & acid levels
- .how you cope with stress
- .an analysis of genetic strengths and weaknesses
- .Early indications of a condition are often apparent in the eye, before they manifest as symptoms in the body.
